document management + software solutions + support

future + thinking

Callprint have always employed a programme of continued investment into new equipment and software solutions with particular emphasizes in document management systems.

At Callprint, we always go the extra mile for our customers. We believe that good service and positive relationships are the keys to building brand loyalty. **'together we make it happen'.**

electronic file distribution

This software resides on your system and enables you to create a job, process, preview and submit drawings for printing via LAN, modem and FTP communication.

You can print check prints on an A3/A4 size Windows printer. When you are satisfied with the appearance of the drawing, you can print to one of Call Print's wide format printers via modem / ISDN or internet FTP connections.

Thus, Repro Desk Remote Client permits you to define job settings, pre-process and view the proposed output on a WYSIWYG (what you see is what you get) basis.

Additionally, Repro Desk Remote Client provides you with intuitive, meaningful feedback and pre-emptive warnings before a print job is actually sent to the server.

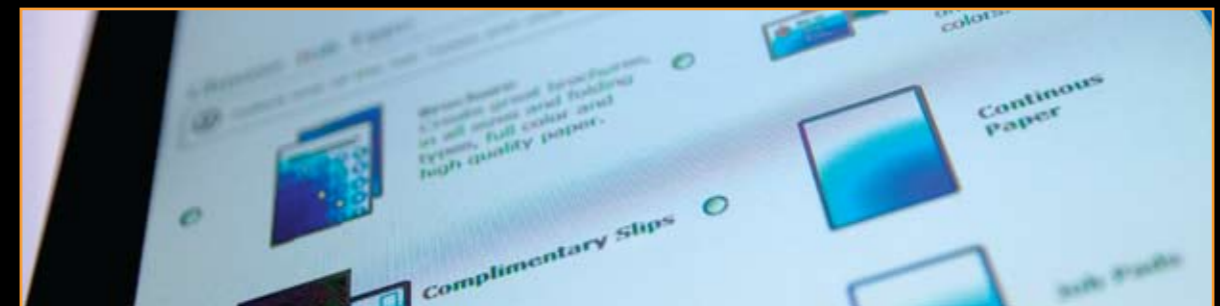

document fulfilment

DFS is a high-end document preparation tool which offers a wide variety of methods to distribute information to its users.

- + Efficiently set up web portals that contain relevant information to a set of products for projects
- + Search for specific documents
- + Download the document online
- + Order delivery of printed documents

web submission

3To is a web-based print solution which allows the preparation and procurement of collateral and leaves you to manage your workflow with ease. Remote working is not a problem as the application is online and provides:

- + Template editing and procurement
- + Template and image libraries
- + Variable data
- + Pricing and estimates online
